

## Special Issue

# Food Safety System: Inspection of Products of Animal Origin

### Message from the Guest Editors

The aspects of food safety and the quality assurance of animal products has become a worldwide research interest given the constant need for improvement to meet consumer satisfaction. Accurate and novel data regarding food safety issues are of great importance, and effective inspection technologies and techniques must receive recognition via the diffusion of their results. The food inspection domain is very vast; hence, this Special Issue is focused more on research based on evaluations regarding compliance with food safety standards, food safety management systems and the assessment of compliance with hygiene parameters in food handling practices.
