Sustainable Strategies for Intensive Livestock Production Systems

Message from the Guest Editors

For this Special Issue, we invite original research papers and reviews improving knowledge and presenting scientific advances in techniques and practices applied to livestock production in intensive systems aiming to: (i) reduce the impacts on water, soils and air; and (ii) improve the efficiency of productions. We are interested in topics including, but not limited, to: Assessment and upgrade of environmental performances in intensive production; Sustainable nutrient cycling in intensive livestock systems; Techniques and technologies for reducing greenhouse gases and atmospheric pollutants emissions; Optimization of manure management chain; Designs and solutions for efficient energy and resource use; Improvement of animal health, comfort and welfare in livestock management.
