

Special Issue

Comparative Oncology in Animals: Advancements in Diagnostics and Treatment

Message from the Guest Editor

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: comparative and translational studies of prognostic and predictive biomarkers in oncology; the study of tumor progression; the evaluation of novel cancer strategies in animals; and therapies that can be translated to other species. Cats and dogs, have a long lifespan and are often affected by cancer. The breed, sex, spaying status, and age at spaying of the animal are only a few examples of the factors that may have an influence on the patient. Moreover, the environmental conditions in different regions of the world can affect the type of cancer experienced by animals.

Guest Editor

Dr. Joanna Mucha

Department of Physiological Sciences, Faculty of Veterinary Medicine, Warsaw University of Life Sciences, Warsaw, Poland

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips

1. Curtin University Sustainable Policy (CUSP) Institute, Curtin University, Kent St., Bentley, Western Australia 6102, Australia
 2. Former Foundation Professor of Animal Welfare, University of Queensland and Foundation Director, Centre for Animal Welfare and Ethics, University of Queensland, Brisbane, Australia
