Animal Health and Welfare Assessment of Pigs

Message from the Guest Editor

We are pleased to invite you to join this Special Issue, which will focus on recent research or reviews that investigate novel approaches and/or technologies used to evaluate the welfare and health of farmed pigs. Research areas may include (but are not limited to) the development of measures suitable for determining whether animals have a positive emotional state, the development of novel biomarkers, the development of new benchmarking data, and the development of versatile and informative tools to communicate findings to a broad range of stakeholders.
