Special Issue

Veterinary Minimally Invasive Surgery

Message from the Guest Editor

Minimally invasive procedures are becoming increasingly available for veterinary patients, both in referral and non-referral settings. New minimally invasive approaches and procedures are regularly described in the peer-reviewed literature. Implementing the best current knowledge while performing MIS is critical for veterinarians who aspire to consistently achieve the best possible outcome for their patients. Our goal is to encourage scientists to publish their experimental and theoretical research in as much detail as possible. The purpose of this Special Issue is therefore to present high-quality documents related to minimally invasive veterinary surgery in the broad sense, and for soft and orthopedic tissues. Research articles. case series and original reviews are invited to this Special Issue. Topics could include, by way of example, case selection and/or prognosis assessment, peri- and intraoperative treatments and procedures to improve outcomes, surgical techniques, surgical instrumentation, post-therapy assistance and complication management.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. Animals adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. Animals is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips
