

# Special Issue

## Veterinary Nursing

### Message from the Guest Editor

We are pleased to announce the Special Issue (SI) of *Animals*, which provides an opportunity for veterinary nursing researchers to showcase their latest findings. For this SI, we are inviting submissions of original manuscripts that address any aspect of veterinary nursing. Veterinary nursing studies in not only companion animals but also food, working, laboratory, and exhibition animals are all welcome. Topics of particular interest are as follows:

- Issues involving stress, quality of life, welfare, and infection in animals that visit or are hospitalized at veterinary hospitals;
- Nursing care or prevention for complications associated with specific examinations, or treatments including surgery and anesthesia;
- Rehabilitation or care to encourage recovery from disease, dysfunction, surgery, and anesthesia;
- Clinical nutrition management and its guidance for clients;
- Pain assessment and relief (excluding the study of analgesics);
- Advanced techniques and technologies that veterinary nurses and technicians perform in general;
- Nursing case report/series which indicate new findings or experiences in veterinary nursing and include insightful discussion.
