

## Special Issue

# Behavior, Welfare, Health and Care of Aging Pets

### Message from the Guest Editor

Thanks to advances in nutrition, care, and veterinary medicine, the life expectancy of dogs, cats, and other pets has significantly increased. Often geriatric pets are complicated patients that could suffer age-related physical and cognitive deterioration, as well as chronic conditions that may have developed from earlier age. The aim of the present special issue is to increase the knowledge in geriatric pets health, behavior, cognition and nutrition. I am pleased to invite you to submit an original work to this special issue. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: geriatric pets health, behavior, cognition and nutrition. I look forward to receiving your contributions.
