

# Special Issue

## Advances in Chimpanzee Welfare

### Message from the Guest Editor

Under the rubric of chimpanzee welfare, the focus will be broad. Manuscripts will be considered that address welfare issues for chimpanzees living in sanctuaries, zoos, research facilities, and the wild. Studies could include measures of behavior, health, cognition, affect, reproduction, temperament, and physiology, as long as the focus is on animal welfare. Contemporary topics such as evaluating welfare in sanctuaries, the use of technology to improve welfare, the transfer of chimpanzees between facilities, fission/fusion management systems, the resocialization of chimpanzees with atypical social backgrounds, and individual differences in welfare-related needs are especially welcome.

I foresee that this volume will compile the most current and important appraisals of chimpanzee welfare, and will propel forward the field of welfare science with regard to this engaging species. I hope that the opportunity of submitting a manuscript to this Special Issue will be of interest to you.
