Are Animal Models Needed to Discover, Develop and Test Pharmaceutical Drugs for Humans in the 21st Century?

Message from the Guest Editor

Despite decades of research, much of which has focused on animal studies, humans continue to suffer from a multiplicity of diseases for which there are no treatments. It is now clear that insights from animal studies frequently fail to translate to humans, explaining the very high failure rate observed when new medicines are evaluated in clinical trials. In addition, there is evidence that animal studies are frequently conducted poorly, meaning that no clear conclusions may be drawn from them. Some claim that if the quality of animal studies was improved and animal models more faithfully captured the relevant human disease, then these models would deliver clinical benefits. Others argue that we need to focus on human-relevant research, pointing to developments in human biology that have yielded *in vitro* and *in silico* techniques capable of providing novel insights into human disease mechanisms, as well as human-relevant disease models for drug development. A key question is whether there is value in refining animal models, or whether these should be relinquished in favour of human-focused approaches. Original manuscripts addressing this point are invited for this special issue.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips

1. Curtin University Sustainable Policy (CUSP) Institute, Curtin University, Kent St., Bentley, Western Australia 6102, Australia
 2. Former Foundation Professor of Animal Welfare, University of Queensland and Foundation Director, Centre for Animal Welfare and Ethics, University of Queensland, Brisbane, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
