

## Special Issue

# Frontiers in Canine and Feline Gastrointestinal Disease

### Message from the Guest Editors

Clinical signs of gastrointestinal disease are amongst the most common presenting complaints in small animal veterinary practice. There are still large knowledge gaps with regard to our understanding of the underlying pathogenesis and therefore the development of non-invasive diagnostic methods or efficacious treatments of common gastrointestinal diseases, such as chronic inflammatory enteropathy, canine protein-losing enteropathy, and feline enteric-associated T-cell lymphoma-2. Therefore, the publication of new scientific findings focused on the area of canine and feline gastroenterology will help to advance our understanding, diagnosis, and treatment of various gastrointestinal diseases. The aim of the present Special Issue is to gather into one publication the most recent advances in canine and feline gastrointestinal research as well as to welcome the contribution of original research papers, literature reviews pertinent to this area.

### Guest Editors

Dr. Aarti Kathrani

The Royal Veterinary College, University of London, London, UK

Prof. Dr. Romy M. Heilmann

Department for Small Animals, College of Veterinary Medicine,  
University of Leipzig, Leipzig, Germany

### Deadline for manuscript submissions

closed (31 July 2022)

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

#### Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
