Chronic Pain Management in Veterinary Medicine

Message from the Guest Editors

Recognition and management of chronic pain represents a real challenge for veterinary practitioners. Indeed, chronic pain is difficult to identify, and due to the complexity of molecular mechanisms underlying it, classic analgesics may not find their targets along the pain pathway and consequently may not be fully effective. Thus, other measures need to be introduced in the analgesic protocol, relying in their efficacy and safety. Despite a vast amount of empirical evidence, veterinary literature concerning chronic pain recognition, efficacy and safety of analgesic measures is still lacking. This Special Issue on “Chronic Pain Management in Veterinary Medicine” aims to present recent research and reviews that will (1) provide strategies and tools for recognition and quantification of chronic pain; (2) provide pharmacokinetic information for setting up analgesic protocols in the target species and (3) demonstrate the efficacy and safety of the tested therapeutic strategies. Each contribution will be an add-on to the existing literature, providing veterinary practitioners with knowledge and skills that will enable a better pain management in their patients.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips

2. Curtin University Sustainability Policy (CUSP) Institute, Kent St., Bentley 6102, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
