Health Management in Companion Animals: Oncology Perspective

Message from the Guest Editors

Tumors in companion animals are a big therapeutic problem in veterinary medicine. These animals are exposed to similar environmental factors, living longer and suffering longer from oncological diseases. They are, therefore, very good models for research in human tumors. For example, canine mammary gland tumors (cMGTs) are the most common neoplasms in intact female canines and are viewed as a suitable model for studying human breast cancers. Another example is canine osteosarcoma (OSA), a highly malignant tumor, which is a suitable model for OSA in humans due to similarities in biological behavior, common molecular features, sharing of the same environment, and the relatively high incidence in dogs. Canine lymphoma is also a suitable comparative model for human non-Hodgkin lymphoma. Research areas may include (but are not limited to) the following: description of research on tumors in companion animals, new diagnostic and therapeutic methods, and connections with human oncology.

Guest Editors

Prof. Dr. Stanisław Dzimira

Department of Pathology, Division of Pathomorphology and Veterinary Forensics, Faculty of Veterinary Medicine, Wrocław University of Environmental and Life Sciences, 50-375 Wrocław, Poland

Dr. Malgorzata Kandefer-Gola

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips

1. Curtin University Sustainable Policy (CUSP) Institute, Curtin University, Kent St., Bentley, WA 6102, Australia
 2. Former Foundation Professor of Animal Welfare, University of Queensland and Foundation Director, Centre for Animal Welfare and Ethics, University of Queensland, Brisbane, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
