

Special Issue

Feed Efficiency and Rumen Bacteria of Cattle

Message from the Guest Editor

With global food security challenges, scientists and producers alike are charged with determining ways to feed almost 10 billion people worldwide by 2050. To address the challenge of increasing protein production to feed a growing population, researchers must find ways to select and maintain feed efficient cattle beyond the boundary of current approaches. The rumen microbiome converts low-quality feedstuffs into usable energy for ruminants and represents the greatest opportunity to optimize cattle nutrition and growth for meeting future global protein demands. The critical role of the rumen microbiome is reflected in its impact on important production phenotypes, such as variation in feed efficiency. Therefore, this Special Issue will publish original research papers or reviews concerning the rumen microbiomes of cattle (both dairy and beef) and their relationship to feed efficiency. The scope of this Special Issue is broad to include a variety of expertise and research interests associated with this topic.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips

2. Curtin University Sustainability Policy (CUSP) Institute, Kent St., Bentley 6102, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
