

Special Issue

Frontiers of Animal Protection

Message from the Guest Editor

I am pleased to announce a Special Issue of *Animals* on the frontiers of animal protection. This Special Issue will assemble high-quality social science research that considers the social, legal, political, and employment dimensions of animal protection. To enrich scholarly understanding and offer insights of value to practitioners, organizational leaders, and policy makers, this Special Issue will highlight and assess the current state and future of animal protection work, policy, and practice globally. The species at the heart of these papers may be companion, farm, wild, or captive animals. Papers on the following topics are especially welcome:

- The legal context shaping animal protection;
- The politics of animal protection and its connection to other social challenges;
- Case studies of front-line programs and their strengths and weaknesses;
- Innovative approaches to animal protection;
- The place of gender, race, and/or class in animal protection;
- Emerging challenges and opportunities for animal protection.
