Gastro-Oesophageal Reflux in Dogs and Cats

Message from the Guest Editors

Oesophagitis may increase morbidity and lead to severe oesophageal stricture, with detrimental consequences. In dogs and cats, the main cause of oesophagitis is gastro-oesophageal reflux (GOR), peri-operatively. Several factors have been identified to predispose dogs and cats to GOR, like age, type of surgical procedure, drugs used for pre-medication and/or anaesthesia, volume and acidity of gastric content, and the duration of preoperative fasting. For many years, strict preoperative fasting rules to ensure an empty stomach at induction had been a common practice. However, there is evidence that long periods of pre-anaesthetic fasting may have negative results, such as increased gastric content acidity and risk for GOR. Another cause of oesophagitis in dogs and cats seems to be a condition analogous to the gastro-oesophageal reflux disease in humans, which is hardly diagnosed and poorly understood, but it is suspected to cause pain and suffering. The aim of this special issue is to present up-to-date research on GOR in dogs and cats, focusing on the understanding of this condition, the clinical implication, and the possible prevention strategies.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips

1. Curtin University Sustainable Policy (CUSP) Institute, Curtin University, Kent St., Bentley, WA 6102, Australia
 2. Former Foundation Professor of Animal Welfare, University of Queensland and Foundation Director, Centre for Animal Welfare and Ethics, University of Queensland, Brisbane, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
