

# Special Issue

## Horse Transport

### Message from the Guest Editors

For equines, transport is the most stressful of management practices. Its interconnectedness with transport engineering, public safety, biosecurity, regulatory and social responsibility, animal and human behaviour and health reflects the emerging unifying concept of One Welfare. Transport practices are needed which acknowledge the horse's needs to reduce a journey's risk of adverse legal, financial, ethical, veterinary, and human health outcomes. This Special Issue of *Animals* offers a comprehensive study of the current science behind improved transport and the direct and indirect benefits for a spectrum of professional and layperson groups.

## About the Journal

### Message from the Editor-in-Chief

*Animals* is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

#### Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
