

## Special Issue

# Microbiome-Derived Metabolites in Animal Nutrition, Health and Disease

### Message from the Guest Editors

The gut microbiome is an exciting and quickly evolving field of study. Indeed, the microbiome is a complex, functional organ that provides nutrients vital to the health of its host. Microbiome-derived metabolites can also influence biological functions beyond the gastrointestinal tract. They help preserve gut homeostasis by strengthening the gut-blood barrier, modulate inflammatory responses, and even affect neurologic functions through the gut-brain axis. Therefore, investigating the impact of diet and diseases in the production of those metabolites can have a significant impact on how we understand health promotion and pathogenesis, and may open the doors to new therapeutic targets. Original manuscripts that investigate the in vivo production of microbiome-derived metabolites are invited for this Special Issue. Topics of special interest include how diets, nutrition, or diseases affect the production of microbiome-derived metabolites, and articles that incorporate dataset integration to identify potential microbial sources for those metabolites are especially welcome.

## About the Journal

### Message from the Editor-in-Chief

*Animals* is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

#### Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary )
