Energy, Protein, and Amino Acids in Non-Ruminant Nutrition

Message from the Guest Editor

Protein, amino acids, and energy feedstuffs constitute, by far, the largest proportion of feed ingredients that are used in non-ruminant diets. Oftentimes, one feedstuff provides all these essentials of nutrition to varying degrees. Our understanding of these important components of animals' diet has increased dramatically over the last few decades. Nevertheless, advances continue to be made in both assays and our understanding of the factors that influence the utilization of these dietary constituents. The aim of this Special Issue is to present the results of the latest and ground-breaking research that is being done to improve non-ruminant animals' utilization of energy, protein, and amino acids.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips

2. Curtin University Sustainability Policy (CUSP) Institute, Kent St., Bentley 6102, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
