Parasitic Arthropods of Vertebrates

Message from the Guest Editors

Parasitic arthropods are a typical vertebrate parasite fauna associated with a variety of terrestrial and aquatic environments. At the same time, they show a diverse range of host specificity and various relationships with the hosts as temporary or stationary parasites. Within the host, they can show high biodiversity, colonizing various microhabitats in the host's body due to the creation of various adaptations to parasitism. Parasites may be asymptomatic, but they can also cause parasitosis, which is dangerous to health and life, or transmit dangerous pathogens. However, many aspects of their systematics/taxonomy, phylogenetic relationships, biology and life cycles, ecology, and mechanisms of parasitism remain poorly studied. Collecting information about their species diversity, occurrence, and relationships with hosts will allow us to fully understand the mechanisms of parasite circulation in ecosystems and understand the complex relationships in the parasite–host system as well as the causes of the development of parasitoses. This, in turn, will allow the development of methods of diagnosis, prevention, and treatment.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips

2. Curtin University Sustainability Policy (CUSP) Institute, Kent St., Bentley 6102, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
