Special Issue

Parasites in Dogs and Cats

Message from the Guest Editor

Parasites affecting dogs and cats are of concern to both medical and veterinary practicioners. On one hand, parasite infections could be a challenge to the veterinary clinician because diseases caused by these organisms could be subclinical or clinical signs could be non-specific; as a consequence, they are often misdiagnosed. On the other hand, global warming and animal movement abroad may favor the spread of some parasites to non-endemic areas, being responsible for the emergence and re-emergence of parasitic diseases. Finally, it should be noted that some parasites are potentially zoonotic and have an impact on public health, since the pet-human bond is strong and dogs and cats live in close proximity to human beings.

The main purpose of this Special Issue is to gather together the most recent research on canine and feline parasitology, with special emphasis on epidemiology, diagnostics, the implementation of parasite control strategies, and the emergence and re-emergence of parasites and zoonoses. Authors are invited to submit original research papers, literature reviews, and case report articles.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. Animals adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. Animals is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips

Institute of Veterinary Medicine and Animal Sciences, Estonian University of Life Sciences, Kreutzwaldi 1, 51014 Tartu, Estonia
 Curtin University Sustainability Policy (CUSP) Institute, Kent St., Bentley 6102, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
