Porcine Herd Health Management

Message from the Guest Editors

Designing and communicating health strategies for swine herds requires a very different approach to that used for individual animals. Health disorders in swine farms are caused by multiple factors. So, the clinical picture of health problems in swine farms results usually from the interaction of pathogens, management and environmental factors. Health management plays a key role in the productivity of farms. In field conditions, veterinarians have to develop and follow a herd health program. Herd health management is also important for the producers. Therefore, it is important to understand the fundamental terms of herd health management strategies in order to monitor health issues. Original manuscripts that address any aspects of porcine herd health management are sought for this Special Issue. Topics of special interest are porcine herd health management, porcine medicine, swine diseases and reproduction, genetics, housing, nutrition and epidemiology. Additional topics include aspects of animal welfare and ethics, legislation, food safety and biosecurity.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips

1. Curtin University Sustainable Policy (CUSP) Institute, Curtin University, Kent St., Bentley, Western Australia 6102, Australia
2. Former Foundation Professor of Animal Welfare, University of Queensland and Foundation Director, Centre for Animal Welfare and Ethics, University of Queensland, Brisbane, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
