# **Special Issue**

# Control over Production Processes for Economic Sustainability of Aquatic Animals

# Message from the Guest Editors

The aim of this Special Issue is to publish original research papers, case studies, and review articles focused on the latest advances in relevant aspects of fish production, fish health/disease, breeding, water quality issues, and overall economics. This includes novel strategies and the application of technologies to enhance the productivity of the fish farming industry and increase its economic and environmental benefits. This Special Issue welcomes submissions from all experts working in the fields of aquatic environments, aquaculture, aquatic animal physiology, fish health, breeding, and stress mitigation, for both marine and freshwater environments.
