

# Special Issue

## New Technologies in Ruminant Breeding

### Message from the Guest Editor

The present Special Issue highlights new technologies to improve livestock breeding efficiency. The future of animal production is conditioned by sustainability, welfare and quality production and, particularly, functional molecules. Indeed, new technologies play a pivotal role in modern breeding, facilitating consumer demands from a one health future perspective. New approaches in animal management, including genetics, molecular biology, and reproduction, represent future ways to assure high-quality food.

### Guest Editor

Prof. Dr. Giuseppe Campanile

Department of Veterinary Medicine and Animal Production, University of Naples Federico II, Via F. Delpino 1, 80137 Naples, Italy

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

#### Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
