

Special Issue

Diseases of the Small and Large Intestine, Liver and Pancreas in Small Animals

Message from the Guest Editors

We are glad to present you this new *Animals* Special Issue on Diseases of the Small and Large Intestine, Liver and Pancreas in Small Animals. Intestinal, pancreatic and hepatic diseases have played a pivotal role in the last 10 years of veterinary literature.

Representing a daily challenge for clinicians worldwide, small-animal gastroenterology has become one of the fastest-growing research fields with new diagnostic and prognostic markers and therapeutical strategies for various intestinal, pancreatic, and liver diseases. This Special Issue of *Animals* aims to collect new advances in canine and feline intestinal, pancreatic and hepatic diseases. Original research papers pertinent to this area are particularly welcome.
