

Special Issue

Swine Behavior and Welfare Monitoring: Ideas for the Way Forward

Message from the Guest Editors

Pork is the most consumed meat in the world. Sustainable swine production systems and practices are expected to ensure animal welfare, allow pigs to perform natural and normal behaviors, and prevent the development of abnormal behavior. The monitoring of behavior and welfare in pigs is the key to evaluating production systems and practices. On-farm monitoring of swine behavior and welfare can be challenging and time consuming. Over the last two decades, animal scientists have utilized emerging technology to overcome this challenge. The aim of this special issue is to showcase developments in monitoring swine behavior and welfare at both the lab and on-farm levels. Original research and review papers that address monitoring individual or group pig behavior under production conditions, including those capable of identifying pigs with compromised or enhanced welfare, or predicting harmful behaviors will be the focus of this issue. Technical notes and short communications that validate new technology in swine behavior and welfare monitoring are also welcomed for submission.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips

1. Curtin University Sustainable Policy (CUSP) Institute, Curtin University, Kent St., Bentley, Western Australia 6102, Australia
 2. Former Foundation Professor of Animal Welfare, University of Queensland and Foundation Director, Centre for Animal Welfare and Ethics, University of Queensland, Brisbane, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
