31 December 2023

**Message from the Guest Editors**

Dear Colleagues,

The use of antibiotic in oral and maxillofacial surgery is a matter of interest for both surgeons and researchers. Treatment of infections and prophylaxis before surgery are some of the most common uses of antibiotics. This Special Issue in this prestigious journal aims to spread to the scientific plateau the innovation of antibiotics in oral and maxillofacial surgery.

Contributions can focus on several topics:

- Advances in oral and maxillofacial infections;
- Antimicrobial and antibiotics therapy;
- Local and systemic antibiotics;
- Antibiotics in third molar surgery;
- Antibiotics in orthognathic surgery;
- Adverse effect of antibiotics;
- Ecological prescription of antibiotics in oral and maxillofacial surgery;
- Maxillofacial trauma and antibiotics.

Message from the Editor-in-Chief

There are very few fields that attract as much attention as scientific endeavor related to antibiotic discovery, use and preservation. The public, patients, scientists, clinicians, policy-makers, NGOs, governments, and supra-governmental organizations are all focusing intensively on it: all are concerned that we use our existing agents more effectively, and develop and evaluate new interventions in time to face emerging challenges for the benefit of present and future generations. We need every discipline to contribute and collaborate: molecular, microbiological, clinical, epidemiological, geographic, economic, social scientific and policy disciples are all key. *Antibiotics* is a nimble, inclusive and rigorous indexed journal as an enabling platform for all who can contribute to solving the greatest broad concerns of the modern world.

Author Benefits

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIplus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Pharmacology & Pharmacy) / CiteScore - Q1 (General Pharmacology, Toxicology and Pharmaceutics)
