### Message from the Guest Editors

There are many pathologies in the neck and facial area that require different treatments depending on their etiology. Antibiotic prophylaxis in ENT, oral and maxillofacial surgery helps the prevention of the infection during and after surgery depending on the invasiveness of the intervention and the general state of the patient.

The extreme complexity of this area requires the participation and collaboration of several specialists who must work together for an increasingly necessary multidisciplinary approach. Dentists, otolaryngologists, and maxillofacial surgeons are the most involved figures.

The focus of this Special Issue is on the treatment of pathologies of the cervical facial region, but also on all preventive therapies that can avoid more complex disorders, reducing patient morbidity and reducing treatment costs.

Deadline for manuscript submissions:  
**closed (15 December 2022)**

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

There are very few fields that attract as much attention as scientific endeavor related to antibiotic discovery, use and preservation. The public, patients, scientists, clinicians, policy-makers, NGOs, governments, and supra-governmental organizations are all focusing intensively on it: all are concerned that we use our existing agents more effectively, and develop and evaluate new interventions in time to face emerging challenges for the benefit of present and future generations. We need every discipline to contribute and collaborate: molecular, microbiological, clinical, epidemiological, geographic, economic, social scientific and policy disciples are all key. *Antibiotics* is a nimble, inclusive and rigorous indexed journal as an enabling platform for all who can contribute to solving the greatest broad concerns of the modern world.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (General Pharmacology, Toxicology and Pharmaceutics)
