Special Issue

Global Strategies for Antimicrobial Stewardship: Insights from WHO and PAHO

Message from the Guest Editors

Antimicrobial resistance (AMR) is closely linked to the levels of antimicrobial consumption/use (AMU) in each health institution or in geographical areas, and to the measures taken by local authorities to mitigate these resistance problems. This Special Issue seeks to gather valuable insights and experiences from around the world, particularly those influenced by organizations such as the World Health Organization (WHO) and the Pan American Health Organization (PAHO), We invite health professionals, researchers, and policymakers to contribute their perspectives through the submission of reviews, research papers, and communications. I believe your contribution would be a valuable addition to both this issue and the broader field of research. While the standard Article Processing Charge (APC) is 2900 CHF, we have successfully negotiated some discounts for our contributors. If you are interested in submitting a manuscript, we kindly ask you to send the first page to the Editorial Office (Ms. Lyric Ren) at lyric.ren@mdpi.com to facilitate the application for a discount.

About the Journal

Message from the Editor-in-Chief

There are very few fields that attract as much attention as scientific endeavor related to antibiotic discovery. use and preservation. The public, patients, scientists, clinicians, policy-makers, NGOs, governments, and supra-governmental organizations are all focusing intensively on it: all are concerned that we use our existing agents more effectively, and develop and evaluate new interventions in time to face emerging challenges for the benefit of present and future generations. We need every discipline to contribute and collaborate: molecular, microbiological, clinical, epidemiological, geographic, economic, social scientific and policy disciples are all key. Antibiotics is a nimble, inclusive and rigorous indexed journal as an enabling platform for all who can contribute to solving the greatest broad concerns of the modern world.

Editor-in-Chief

Prof. Dr. Nicholas Dixon

School of Chemistry and Molecular Bioscience, University of Wollongong, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Infectious Diseases) / CiteScore - Q1 (General Pharmacology, Toxicology and Pharmaceutics)
