

Special Issue

Spread of Multidrug-Resistant Microorganisms, 2nd Edition

Message from the Guest Editors

The first edition of the Special Issue “Spread of Multidrug-Resistant Microorganisms” was published in 2021. It is a successful collection comprising 11 excellent papers. This encouraged us to open a second edition on the same topic. As a continuation of the first Special Issue, this second edition focuses on the epidemiology of MDROs, the activity of new antimicrobials, implication of various determinants of resistance and strategies to control the diffusions of MDROs. Researchers working in this field are encouraged to submit their best manuscript(s) to this Special Issue.

About the Journal

Message from the Editor-in-Chief

There are very few fields that attract as much attention as scientific endeavor related to antibiotic discovery, use and preservation. The public, patients, scientists, clinicians, policy-makers, NGOs, governments, and supra-governmental organizations are all focusing intensively on it: all are concerned that we use our existing agents more effectively, and develop and evaluate new interventions in time to face emerging challenges for the benefit of present and future generations. We need every discipline to contribute and collaborate: molecular, microbiological, clinical, epidemiological, geographic, economic, social scientific and policy disciplines are all key. *Antibiotics* is a nimble, inclusive and rigorous indexed journal as an enabling platform for all who can contribute to solving the greatest broad concerns of the modern world.

Editor-in-Chief

Prof. Dr. Nicholas Dixon
School of Chemistry and Molecular Bioscience, University of
Wollongong, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Infectious Diseases) / CiteScore - Q1 (General Pharmacology, Toxicology and Pharmaceutics)
