

## Special Issue

# Common Paediatric Infections, Chemoprophylaxis and Antimicrobial Stewardship

### Message from the Guest Editors

We are looking to commission Editorials and reviews and accept original research relating to the management of paediatric infections. We are specifically interested in manuscripts that discuss the challenges and benefits of antimicrobial stewardship in paediatrics. This may include evidence where antibiotics can either be avoided, narrowed in spectrum or stopped earlier. Examples could include how to safely identify lower risk cohorts of fertile children that do not require antibiotics, how better diagnostics can be used to improve stewardship, how to switch from parenteral to oral antibiotics, how to stop antibiotics earlier and how resistance patterns of common infections have changed over time.

## About the Journal

### Message from the Editor-in-Chief

There are very few fields that attract as much attention as scientific endeavor related to antibiotic discovery, use and preservation. The public, patients, scientists, clinicians, policy-makers, NGOs, governments, and supra-governmental organizations are all focusing intensively on it: all are concerned that we use our existing agents more effectively, and develop and evaluate new interventions in time to face emerging challenges for the benefit of present and future generations. We need every discipline to contribute and collaborate: molecular, microbiological, clinical, epidemiological, geographic, economic, social scientific and policy disciplines are all key. *Antibiotics* is a nimble, inclusive and rigorous indexed journal as an enabling platform for all who can contribute to solving the greatest broad concerns of the modern world.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Infectious Diseases) / CiteScore - Q1 (General Pharmacology, Toxicology and Pharmaceutics)
