

## Special Issue

# Rational Use of Antibiotics in Bloodstream Infection, 2nd Edition

### Message from the Guest Editor

In 2022, the first volume of the Special Issue titled "Rational Use of Antibiotics in Bloodstream Infection" was published. The successful issue with six excellent papers has encouraged the publication of a second volume on the same topic. In continuation of the Special Issue published in 2022, this second volume examines rational antibiotic use in bloodstream infections, especially in critical care patients, antibiotic resistance and multiple-drug-resistant bacteria-related bloodstream infections. Antibiotic stewardship, education, new techniques or artificial intelligence to reduce the duration of bacteremia, new classes of antibiotics or antibiotic regimens to treat multiple-drug-resistant bacteria-related bloodstream infections are all encouraged.

### Guest Editor

Dr. Tsung-Yu Huang

Division of Infectious Diseases, Department of Internal Medicine,  
Chang Gung Memorial Hospital, Chiayi, Taiwan

### Deadline for manuscript submissions

closed (30 September 2024)

## About the Journal

### Message from the Editor-in-Chief

There are very few fields that attract as much attention as scientific endeavor related to antibiotic discovery, use and preservation. The public, patients, scientists, clinicians, policy-makers, NGOs, governments, and supra-governmental organizations are all focusing intensively on it: all are concerned that we use our existing agents more effectively, and develop and evaluate new interventions in time to face emerging challenges for the benefit of present and future generations. We need every discipline to contribute and collaborate: molecular, microbiological, clinical, epidemiological, geographic, economic, social scientific and policy disciplines are all key. *Antibiotics* is a nimble, inclusive and rigorous indexed journal as an enabling platform for all who can contribute to solving the greatest broad concerns of the modern world.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Infectious Diseases) / CiteScore - Q1 (General Pharmacology, Toxicology and Pharmaceutics)
