

## Special Issue

# Diagnosis and Antimicrobial Therapy of Osteoarticular Infection

### Message from the Guest Editor

Orthopedic infections represent a pivotal and costly facet in the management of bone and joint disorders. Despite substantial efforts to address this issue through the development of diagnostic and therapeutic methods, lingering questions persist, impeding the attainment of favorable outcomes in these operations. We extend a warm invitation for comprehensive studies focusing on the Diagnosis and Antimicrobial Therapy of Osteoarticular Infection. This Special Issue welcomes original research. By fostering a diverse range of studies, we aim to advance our understanding and enhance the effectiveness of interventions in the complex realm of orthopedic infections.

### Guest Editor

Dr. Janet D. Conway

International Center for Limb Lengthening, Rubin Institute for Advanced Orthopedics, Sinai Hospital of Baltimore, Baltimore, MD 21215, USA

### Deadline for manuscript submissions

31 October 2025

## About the Journal

### Message from the Editor-in-Chief

There are very few fields that attract as much attention as scientific endeavor related to antibiotic discovery, use and preservation. The public, patients, scientists, clinicians, policy-makers, NGOs, governments, and supra-governmental organizations are all focusing intensively on it: all are concerned that we use our existing agents more effectively, and develop and evaluate new interventions in time to face emerging challenges for the benefit of present and future generations. We need every discipline to contribute and collaborate: molecular, microbiological, clinical, epidemiological, geographic, economic, social scientific and policy disciplines are all key. *Antibiotics* is a nimble, inclusive and rigorous indexed journal as an enabling platform for all who can contribute to solving the greatest broad concerns of the modern world.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Infectious Diseases) / CiteScore - Q1 (General Pharmacology, Toxicology and Pharmaceutics)
