

## Special Issue

# Natural Compounds as Antimicrobial Agents, 3rd Edition

### Message from the Guest Editor

We have published two successful volumes of the Special Issue “Natural Compounds as Antimicrobial Agents”, and this has encouraged us to open a third volume focused on the same topic. As a continuation of the Special Issues published in 2019 and 2020, this third volume will further develop the use of these compounds for many different applications, from clinical aspects to their use in the food industry, or even in animal production. Researchers from different parts of the world are also aware of plant-derived substances specific to their latitudes for which there is sparse scientific research published in the literature, and this is a good opportunity to share that knowledge with the scientific community through the open access journal *Antibiotics*. All these natural compounds share the advantages of having soft legal regulations as well as better user perceptions regarding applications that are derived from a natural or traditional origin.

### Guest Editor

Prof. Dr. Carlos M. Franco

Department of Analytical Chemistry, Nutrition and Bromatology, Faculty of Veterinary Science, University of Santiago de Compostela, 27002 Lugo, Spain

### Deadline for manuscript submissions

31 December 2025

## About the Journal

### Message from the Editor-in-Chief

There are very few fields that attract as much attention as scientific endeavor related to antibiotic discovery, use and preservation. The public, patients, scientists, clinicians, policy-makers, NGOs, governments, and supra-governmental organizations are all focusing intensively on it: all are concerned that we use our existing agents more effectively, and develop and evaluate new interventions in time to face emerging challenges for the benefit of present and future generations. We need every discipline to contribute and collaborate: molecular, microbiological, clinical, epidemiological, geographic, economic, social scientific and policy disciplines are all key. *Antibiotics* is a nimble, inclusive and rigorous indexed journal as an enabling platform for all who can contribute to solving the greatest broad concerns of the modern world.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Infectious Diseases) / CiteScore - Q1 (General Pharmacology, Toxicology and Pharmaceutics)
