

## Special Issue

# The Evolving Role of Antimicrobial Stewardship Interventions in Combating Antibiotic Resistance

### Message from the Guest Editor

Antimicrobial resistance is one of the greatest public health threats that affects us all. While overall antibiotic use is decreasing in many countries, inappropriate antibiotic use still represents over 20% of cases in hospitals. As physicians responsible for patient health as well as public health, it is vital to learn about prudent use of antibiotics. Further, it is important that we, as responsible clinicians, policy makers, and researchers, develop methods of encouraging physicians to use antimicrobials appropriately. This Special Issue therefore encourages submissions on research in areas of antimicrobial stewardship interventions.

## About the Journal

### Message from the Editor-in-Chief

There are very few fields that attract as much attention as scientific endeavor related to antibiotic discovery, use and preservation. The public, patients, scientists, clinicians, policy-makers, NGOs, governments, and supra-governmental organizations are all focusing intensively on it: all are concerned that we use our existing agents more effectively, and develop and evaluate new interventions in time to face emerging challenges for the benefit of present and future generations. We need every discipline to contribute and collaborate: molecular, microbiological, clinical, epidemiological, geographic, economic, social scientific and policy disciplines are all key. *Antibiotics* is a nimble, inclusive and rigorous indexed journal as an enabling platform for all who can contribute to solving the greatest broad concerns of the modern world.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Infectious Diseases) / CiteScore - Q1 (General Pharmacology, Toxicology and Pharmaceutics)
