

Special Issue

The Interplay between Urinary Tract Infections and Antimicrobial Resistance

Message from the Guest Editor

In this Special Issue of *Antibiotics*, authors are invited to submit articles covering any topic related to the interplay between UTI and antimicrobial resistance, including some of the following topics:

- Diagnosis and treatment UTI with special focus in older adults and the management of asymptomatic bacteriuria;
- Antibiotic resistance in uropathogens;
- Management of chronic prostatitis due to multi-resistant microorganisms;
- Antimicrobial stewardship;
- Role of non-antimicrobial therapies for the management of UTI including sublingual vaccination.

Keywords

- urinary tract infections
- uropathogens
- prostate infections
- antimicrobial stewardship
- antimicrobial resistance
- novel therapeutic strategies

About the Journal

Message from the Editor-in-Chief

There are very few fields that attract as much attention as scientific endeavor related to antibiotic discovery, use and preservation. The public, patients, scientists, clinicians, policy-makers, NGOs, governments, and supra-governmental organizations are all focusing intensively on it: all are concerned that we use our existing agents more effectively, and develop and evaluate new interventions in time to face emerging challenges for the benefit of present and future generations. We need every discipline to contribute and collaborate: molecular, microbiological, clinical, epidemiological, geographic, economic, social scientific and policy disciplines are all key. *Antibiotics* is a nimble, inclusive and rigorous indexed journal as an enabling platform for all who can contribute to solving the greatest broad concerns of the modern world.

Editor-in-Chief

Prof. Dr. Nicholas Dixon
School of Chemistry and Molecular Bioscience, University of
Wollongong, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Infectious Diseases) / CiteScore - Q1 (General Pharmacology, Toxicology and Pharmaceutics)
