Special Issue

Clostridioides difficile Infection, 3rd Edition

Message from the Guest Editor

We have established two successful editions of the Special Issue "Clostridioides difficile Infection". There are over twenty excellent papers published. These papers shed light on several aspects of this complex disease, including the clinical course of Clostridioides difficile infection (CDI) and the mortality rate in different settings and patient populations, in addition to the risk factors for CDI recurrence and novel therapeutic approaches. This result encouraged us to launch a third edition on the same topic. As a continuation of the previous Special Issues, this third edition will also deliver an invaluable compendium of the latest studies on any aspects concerning CDI.

About the Journal

Message from the Editor-in-Chief

There are very few fields that attract as much attention as scientific endeavor related to antibiotic discovery. use and preservation. The public, patients, scientists, clinicians, policy-makers, NGOs, governments, and supra-governmental organizations are all focusing intensively on it: all are concerned that we use our existing agents more effectively, and develop and evaluate new interventions in time to face emerging challenges for the benefit of present and future generations. We need every discipline to contribute and collaborate: molecular, microbiological, clinical, epidemiological, geographic, economic, social scientific and policy disciples are all key. Antibiotics is a nimble, inclusive and rigorous indexed journal as an enabling platform for all who can contribute to solving the greatest broad concerns of the modern world.

Editor-in-Chief

Prof. Dr. Nicholas Dixon

School of Chemistry and Molecular Bioscience, University of Wollongong, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Infectious Diseases) / CiteScore - Q1 (General Pharmacology, Toxicology and Pharmaceutics)
