

## Special Issue

# Antimicrobial Therapy in Oral Diseases, 2nd Edition

### Message from the Guest Editors

Following the success of the first volume of the Special Issue “Antimicrobial Therapy in Oral Diseases”, we are pleased to announce the launch of this second edition. As a continuation of the Special Issue, this volume will focus on the clinical use of antibiotics and antiseptic products as replacements in antibiotherapy in dentistry, as well as showcasing in-depth research on antibiotic resistance in oral bacteria, the effects of antibiotics and antiseptics on oral cell behavior and oral healing, and new antimicrobial-based products for oral use. We particularly welcome clinical and preclinical studies on the use of antimicrobials in periodontal and peri-implant diseases.

We welcome experimental and well-designed clinical studies addressing, but not limited to, the above-mentioned topics, especially multidisciplinary works.

---

### Guest Editors

Prof. Dr. Alexandra Roman

Department of Periodontology, Faculty of Dental Medicine, Iuliu Hațieganu University of Medicine and Pharmacy Cluj-Napoca, 400012 Cluj-Napoca, Romania

Dr. Andrada Soanca

Department of Periodontology, Faculty of Dental Medicine, Iuliu Hațieganu University of Medicine and Pharmacy Cluj-Napoca, 400012 Cluj-Napoca, Romania

## About the Journal

### Message from the Editor-in-Chief

There are very few fields that attract as much attention as scientific endeavor related to antibiotic discovery, use and preservation. The public, patients, scientists, clinicians, policy-makers, NGOs, governments, and supra-governmental organizations are all focusing intensively on it: all are concerned that we use our existing agents more effectively, and develop and evaluate new interventions in time to face emerging challenges for the benefit of present and future generations. We need every discipline to contribute and collaborate: molecular, microbiological, clinical, epidemiological, geographic, economic, social scientific and policy disciplines are all key. *Antibiotics* is a nimble, inclusive and rigorous indexed journal as an enabling platform for all who can contribute to solving the greatest broad concerns of the modern world.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Infectious Diseases) / CiteScore - Q1 (General Pharmacology, Toxicology and Pharmaceutics)
