

Special Issue

The Issue of Multidrug-Resistant Pathogens in Nosocomial Infections

Message from the Guest Editor

Infections by multidrug-resistant pathogens, especially in the nosocomial setting, represent a new pandemic throughout the world. The present Special Issue is aimed at collecting high-quality scientific papers conveying the multiple facets of the problem. Both primary research and secondary research papers are welcomed. The defining keywords of the included articles will be the following:

- bacterial infections
- fungal infections
- multidrug-resistance
- antibiotics
- antifungals
- antimicrobial stewardship
- nosocomial infections
- novel drugs

Guest Editor

Dr. Alberto Enrico Maraolo

Section of Infectious Diseases, Department of Clinical Medicine and Surgery, University of Naples "Federico II", Naples, Italy

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

There are very few fields that attract as much attention as scientific endeavor related to antibiotic discovery, use and preservation. The public, patients, scientists, clinicians, policy-makers, NGOs, governments, and supra-governmental organizations are all focusing intensively on it: all are concerned that we use our existing agents more effectively, and develop and evaluate new interventions in time to face emerging challenges for the benefit of present and future generations. We need every discipline to contribute and collaborate: molecular, microbiological, clinical, epidemiological, geographic, economic, social scientific and policy disciplines are all key. *Antibiotics* is a nimble, inclusive and rigorous indexed journal as an enabling platform for all who can contribute to solving the greatest broad concerns of the modern world.

Editor-in-Chief

Prof. Dr. Nicholas Dixon
School of Chemistry and Molecular Bioscience, University of
Wollongong, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Infectious Diseases) / CiteScore - Q1 (General Pharmacology, Toxicology and Pharmaceutics)
