

## Special Issue

# Analysis of Virulence Mechanisms of Bacterial Pathogens in Aquaculture

### Message from the Guest Editor

*Antibiotic* is launching a Special Issue titled “Analysis of Virulence Mechanisms of Bacterial Pathogens in Aquaculture”. I encourage authors to submit contributions that cover aspects such as bacterial virulence mechanisms, the ecology of bacterial pathogens, interactions of bacterial environment and natural habitats, prevention of bacterial infections, limitation of the dissemination of pathogens outside its natural habitats, and any other subject related with this matter. This is a wide area, I propose that authors submit either an investigation article or a revision of some of the principal bacterial pathogens with a high impact in aquaculture. This issue will promote the interests of aquaculture industries, personal of quality control, and masters students.

### Guest Editor

Prof. Dr. Teresa Pérez Nieto  
Universidade de Vigo, Vigo, Spain

### Deadline for manuscript submissions

closed (28 February 2021)

## About the Journal

### Message from the Editor-in-Chief

There are very few fields that attract as much attention as scientific endeavor related to antibiotic discovery, use and preservation. The public, patients, scientists, clinicians, policy-makers, NGOs, governments, and supra-governmental organizations are all focusing intensively on it: all are concerned that we use our existing agents more effectively, and develop and evaluate new interventions in time to face emerging challenges for the benefit of present and future generations. We need every discipline to contribute and collaborate: molecular, microbiological, clinical, epidemiological, geographic, economic, social scientific and policy disciplines are all key. *Antibiotics* is a nimble, inclusive and rigorous indexed journal as an enabling platform for all who can contribute to solving the greatest broad concerns of the modern world.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Infectious Diseases) / CiteScore - Q1 (General Pharmacology, Toxicology and Pharmaceutics)
