

## Special Issue

# Valorization of Waste Through Antioxidant Extraction and Utilization

### Message from the Guest Editor

We invite you to submit current research and review papers for this Special issue, which will cover the valorization of different types of waste, as waste can be used to extract antioxidants and utilized in different value-added products. This research can include both extraction and utilization relating to the following ideas: valorization of waste, eco-friendly green extraction techniques, innovative technologies, in vitro study of antioxidants, by-products, food products development, shelf stability, and biomass production.

## About the Journal

### Message from the Editor-in-Chief

It has been recognized in medical sciences that in order to prevent adverse effects of “oxidative stress” a balance exists between prooxidants and antioxidants in living systems. Imbalances are found in a variety of diseases and chronic health situations. Our journal *Antioxidants* serves as an authoritative source of information on current topics of research in the area of oxidative stress and antioxidant defense systems. The future is bright for antioxidant research and since 2012, *Antioxidants* has become a key forum for researchers to bring their findings to the forefront.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, PubAg, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Chemistry, Medicinal) / CiteScore - Q1 (Food Science)
