

Special Issue

Antioxidant Metabolism in Plants and Algae

Message from the Guest Editors

This Special Issue aims to collect papers dealing with all aspects of antioxidants from plants (including algae and cyanobacteria), such as, but not limited to, carotenoids, anthocyanins, vitamin C, vitamin E, and phenolics. Papers describing recent developments in the molecular regulation of these metabolisms and their responses to environmental challenges will be especially welcome, although molecular cloning and functional characterization of specialized enzymes are also within the scope of this Special Issue. Because there has been a large body of reports on the bioactivity of antioxidants to humans, and there are other more suitable Special Issues in this journal opening in parallel, those physiological and/or nutritional studies, and other studies using animal systems, will not be considered.

Guest Editors

Prof. Dr. Shan Lu

Prof. Dr. Chunyi Zhang

Prof. Dr. Aixia Cheng

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

It has been recognized in medical sciences that in order to prevent adverse effects of “oxidative stress” a balance exists between prooxidants and antioxidants in living systems. Imbalances are found in a variety of diseases and chronic health situations. Our journal *Antioxidants* serves as an authoritative source of information on current topics of research in the area of oxidative stress and antioxidant defense systems. The future is bright for antioxidant research and since 2012, *Antioxidants* has become a key forum for researchers to bring their findings to the forefront.

Editor-in-Chief

Prof. Dr. Alessandra Napolitano

Department of Chemical Sciences, University of Naples “Federico II”,
Via Cintia 4, I-80126 Naples, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Chemistry, Medicinal) / CiteScore - Q1 (Food Science)
