Special Issue

Antioxidants in Husbandry Animal Production

Message from the Guest Editor

This Special Issue will address the dietary supplementation of functional natural antioxidants on the improvement of animal growth performance, reproductive performance, meat quality, immune responses, and so on, and discuss their functional mechanisms. We invite you to submit your latest research findings or a review article to this Special Issue, which will bring together current research concerning naturally occurring antioxidants or antioxidants produced via fermentation or other processing without changing the natural characteristics of the organisms. We believe that this Special Issue, "Antioxidants in Husbandry Animal Production", will help to highlight the most recent advances in all aspects of natural antioxidants in improving husbandry animal production.

About the Journal

Message from the Editor-in-Chief

It has been recognized in medical sciences that in order to prevent adverse effects of "oxidative stress" a balance exists between prooxidants and antioxidants in living systems. Imbalances are found in a variety of diseases and chronic health situations. Our journal *Antioxidants* serves as an authoritative source of information on current topics of research in the area of oxidative stress and antioxidant defense systems. The future is bright for antioxidant research and since 2012, *Antioxidants* has become a key forum for researchers to bring their findings to the forefront.

Editor-in-Chief

Prof. Dr. Alessandra Napolitano

Department of Chemical Sciences, University of Naples "Federico II", Via Cintia 4, I-80126 Naples, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Chemistry, Medicinal) / CiteScore - Q1 (Food Science)
