

## Special Issue

# Bioactive Extract Derived Marine Algae in Antioxidants

### Message from the Guest Editor

Marine algae serve as a valuable source for the discovery of new drugs as antioxidants under an established history of use in health care and therapy. From this, the potential of natural products from algae as antioxidants is gaining interest for the treatment or prevention of global health problems with rising prevalence. This Special Issue is aimed at gathering the recent advances and future perspectives outlining the potential of bioactive-extracts-derived marine algae for pharmaceutical applications, with an emphasis on their molecular pathways, metabolic regulation, and endocrine function. As , I would like to invite authors to provide recent advances in the attractive field of marine algae with their antioxidant properties.

## About the Journal

### Message from the Editor-in-Chief

It has been recognized in medical sciences that in order to prevent adverse effects of “oxidative stress” a balance exists between prooxidants and antioxidants in living systems. Imbalances are found in a variety of diseases and chronic health situations. Our journal *Antioxidants* serves as an authoritative source of information on current topics of research in the area of oxidative stress and antioxidant defense systems. The future is bright for antioxidant research and since 2012, *Antioxidants* has become a key forum for researchers to bring their findings to the forefront.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, PubAg, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Chemistry, Medicinal) / CiteScore - Q1 (Food Science)
