

Special Issue

The Pharma-Nutritional Role of Antioxidant Phytochemicals in Health and Disease

Message from the Guest Editors

Dietary phytochemicals or their gut-derived metabolites act as signaling molecules, modulating one or more cellular pathways associated with disease prevention. Moreover, dietary phytochemicals can be accommodated in specific binding sites in the proximity of the active site. Finally, the excellent safety profile and large structural diversity make dietary phytochemicals particularly attractive for drug discovery processes. This Special Issue will collect publications on topics including (but not limited to):

- Biological effects associated with disease-prevention pathways;
- Molecular pharmacology techniques to identify potential targets;
- Phytochemical content of fruits and vegetables (e.g., variability, methods to estimate phytochemical content);
- Bioavailability of dietary phytochemicals (e.g., gut microbiota, culinary techniques, additive/synergistic effects);
- Dietary phytochemicals and the design of new drugs/supplements to target disease-prevention mechanisms;
- Dietary phytochemicals and human intervention trials;
- Dietary phytochemicals from an epidemiological perspective.

About the Journal

Message from the Editor-in-Chief

It has been recognized in medical sciences that in order to prevent adverse effects of “oxidative stress” a balance exists between prooxidants and antioxidants in living systems. Imbalances are found in a variety of diseases and chronic health situations. Our journal *Antioxidants* serves as an authoritative source of information on current topics of research in the area of oxidative stress and antioxidant defense systems. The future is bright for antioxidant research and since 2012, *Antioxidants* has become a key forum for researchers to bring their findings to the forefront.

Editor-in-Chief

Prof. Dr. Alessandra Napolitano

Department of Chemical Sciences, University of Naples “Federico II”,
Via Cintia 4, I-80126 Naples, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Chemistry, Medicinal) / CiteScore - Q1 (Food Science)
