

Special Issue

The Antioxidants in Fermented Foods

Message from the Guest Editors

Fermented food is garnering prolific attention from consumers, who have a special interest in what these products may offer to their health. The presence of antioxidants can determine the healthy properties of these foods. This Special Issue therefore aims to provide an overview of the chemical or microbiological production of antioxidants from the initial food matrices, the antioxidant products of the microbial metabolism, as well as the methods employed to perform in vitro/in vivo evaluations of these properties and their impact on health.

Guest Editors

Prof. Dr. Yves Waché

Dr. Nadjet Benaïda-Debbache

Dr. Fares Boudjouan

About the Journal

Message from the Editor-in-Chief

It has been recognized in medical sciences that in order to prevent adverse effects of “oxidative stress” a balance exists between prooxidants and antioxidants in living systems. Imbalances are found in a variety of diseases and chronic health situations. Our journal *Antioxidants* serves as an authoritative source of information on current topics of research in the area of oxidative stress and antioxidant defense systems. The future is bright for antioxidant research and since 2012, *Antioxidants* has become a key forum for researchers to bring their findings to the forefront.

Editor-in-Chief

Prof. Dr. Alessandra Napolitano

Department of Chemical Sciences, University of Naples “Federico II”,
Via Cintia 4, I-80126 Naples, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Chemistry, Medicinal) / CiteScore - Q1 (Food Science)
