

## Special Issue

# Mechanisms and Effects of Antioxidant-Rich Functional Beverages

### Message from the Guest Editor

Dear Colleagues The high-quality beverage industry is always looking for ways to produce highly satisfactory content, and the quantity, quality and health effects of their components are of a great importance. Research in this area is driving scientific and technical developments towards this goal. Exploitation of old and innovative ingredients, novel recipes, selective and more-efficient processing techniques, and innovative quality assays are mere examples of the areas of interest for researchers to investigate in order to demonstrate the opportunities for improving high-quality beverages.

This Special Issue will collect research articles and reviews relevant to these issues and we look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

It has been recognized in medical sciences that in order to prevent adverse effects of “oxidative stress” a balance exists between prooxidants and antioxidants in living systems. Imbalances are found in a variety of diseases and chronic health situations. Our journal *Antioxidants* serves as an authoritative source of information on current topics of research in the area of oxidative stress and antioxidant defense systems. The future is bright for antioxidant research and since 2012, *Antioxidants* has become a key forum for researchers to bring their findings to the forefront.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, PubAg, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Chemistry, Medicinal) / CiteScore - Q1 (Food Science)
