

## Special Issue

# Natural Antioxidants: Multiple Mechanisms for Skin Protection—2nd Edition

### Message from the Guest Editor

We encourage the submission of studies that utilize sophisticated experimental methods, such as ‘multi-omics’ approaches (including genomics, epigenomics, proteomics, lipidomics, metabolomics, and microbiomics), to investigate the protective effects of antioxidants for the skin. This Special Issue (SI), entitled *Natural Antioxidants: Multiple Mechanisms for Skin Protection—2nd Edition*, aims to encourage researchers to showcase their studies related to the skin protection offered by natural antioxidants. The scope of this Special Issue includes (but is not limited to) the following research topics: (1) evaluations of natural antioxidants’ protective effects on the skin; (2) investigations of the mechanisms of action; (3) the discovery of the molecular target(s) of action; and (4) the use of natural antioxidants and their derivatives as therapeutic agents and/or cosmeceutical ingredients. We welcome the submission of research articles, reviews, perspectives, and communications.

### Guest Editor

Dr. Hang Ma

Department of Biomedical and Pharmaceutical Sciences, College of Pharmacy, University of Rhode Island, 7 Greenhouse Rd, Kingston, RI 02881, USA

### Deadline for manuscript submissions

closed (15 January 2025)

## About the Journal

### Message from the Editor-in-Chief

It has been recognized in medical sciences that in order to prevent adverse effects of “oxidative stress” a balance exists between prooxidants and antioxidants in living systems. Imbalances are found in a variety of diseases and chronic health situations. Our journal *Antioxidants* serves as an authoritative source of information on current topics of research in the area of oxidative stress and antioxidant defense systems. The future is bright for antioxidant research and since 2012, *Antioxidants* has become a key forum for researchers to bring their findings to the forefront.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, PubAg, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Chemistry, Medicinal) / CiteScore - Q1 (Food Science)
