

## Special Issue

# The Role of Reactive Oxygen Species in Innate Immunity

### Message from the Guest Editors

In this Special Issue, we want to invite researchers to contribute both original research and review articles. Studies that provide strong mechanistic insights regarding the precise roles of ROS in innate immune cells are still scarce. Therefore, we particularly welcome articles that unravel new molecular aspects of redox-regulated functions during innate immune responses. Articles that offer novel methodological approaches for detailed analysis of ROS production in innate immune cells are also highly appreciated.

## About the Journal

### Message from the Editor-in-Chief

It has been recognized in medical sciences that in order to prevent adverse effects of “oxidative stress” a balance exists between prooxidants and antioxidants in living systems. Imbalances are found in a variety of diseases and chronic health situations. Our journal *Antioxidants* serves as an authoritative source of information on current topics of research in the area of oxidative stress and antioxidant defense systems. The future is bright for antioxidant research and since 2012, *Antioxidants* has become a key forum for researchers to bring their findings to the forefront.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, PubAg, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Chemistry, Medicinal) / CiteScore - Q1 (Food Science)
