

Special Issue

Antioxidants in Poultry Nutrition and Reproduction

Message from the Guest Editor

Poultry production is associated with a range of stresses, including nutritional, environmental, technological and biological/internal stress. Evidence is actively accumulating to prove that at the molecular level most of these stresses are associated with redox disbalance and oxidative stress, causing a decrease in productive and reproductive performance and compromising animal/poultry health. This Special Issue will publish original research papers and reviews on aspects of natural antioxidants that relate to the following topics: the function and regulation of antioxidants in poultry; understanding the pathways of redox homeostasis in poultry; the relationship between various antioxidants and poultry reproduction and health; role of natural antioxidants in fighting commercially-relevant stresses (heat stress, mycotoxin stress, etc.), the role of natural antioxidants in maintaining meat and egg quality, etc.

About the Journal

Message from the Editor-in-Chief

It has been recognized in medical sciences that in order to prevent adverse effects of “oxidative stress” a balance exists between prooxidants and antioxidants in living systems. Imbalances are found in a variety of diseases and chronic health situations. Our journal *Antioxidants* serves as an authoritative source of information on current topics of research in the area of oxidative stress and antioxidant defense systems. The future is bright for antioxidant research and since 2012, *Antioxidants* has become a key forum for researchers to bring their findings to the forefront.

Editor-in-Chief

Via Cintia 4, I-80126 Naples, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Chemistry, Medicinal) / CiteScore - Q1 (Food Science)
