

Special Issue

Extraction of Antioxidants from Food Waste II

Message from the Guest Editor

Despite a large number of publications on the extraction of antioxidants from food waste, there is still a great interest in the topic and a lack of examples of large-scale industrial implementations of research results.

This second edition Special Issue welcomes manuscripts that could fill the gap between research and industrial applications, addressing the following themes related to the extraction of antioxidants from food waste:

- Investigation of new functionalities of recovered antioxidants for both human health and specific technological applications.

- Assessment of antioxidants stability and efficiency in vivo and real systems.

- Emerging non-conventional greener extraction technologies.

- Evaluation of economic and logistic feasibility of extraction processes.

- Innovative food and non-food applications such as materials, cosmetics, pharmacy.

Guest Editor

Prof. Dr. Giorgia Spigno

About the Journal

Message from the Editor-in-Chief

It has been recognized in medical sciences that in order to prevent adverse effects of “oxidative stress” a balance exists between prooxidants and antioxidants in living systems. Imbalances are found in a variety of diseases and chronic health situations. Our journal *Antioxidants* serves as an authoritative source of information on current topics of research in the area of oxidative stress and antioxidant defense systems. The future is bright for antioxidant research and since 2012, *Antioxidants* has become a key forum for researchers to bring their findings to the forefront.

Editor-in-Chief

Prof. Dr. Alessandra Napolitano

Department of Chemical Sciences, University of Naples “Federico II”,
Via Cintia 4, I-80126 Naples, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Chemistry, Medicinal) / CiteScore - Q1 (Food Science)
